Make your own ‘Welcome’ Christmas wreath

Activity for preschool age children

What you’ll need:

- Large paper plates or piece of cardboard
- Green paint and green tissue paper
- Scissors and a glue stick or liquid PVA glue
- Red pom-poms, red paper circles or tissue paper
- Ribbon, wool, or a pre-made bow

Step-by-step instructions

1. Prepare the base: Cut out the centre of a large paper plate or use a cardboard circle with a hole cut out of the middle to form the wreath loop.
2. Paint or cover the ring: Have the children paint the paper plate or cardboard green. Using evergreen leaves or green paper.
3. Add texture or leaves: Let the children glue green tissue paper squares (scrunched up slightly), paper handprint cutouts, or paper leaves around the ring.
4. Add the berries and bow: Glue red pom-poms or red paper circles around the wreath. Staple or glue a festive red bow to the wreath.
5. Punch a hanging hole: Use a hole punch at the top, thread a piece of ribbon and tie a loop so the children can take their decoration home.
